SCAMP, SCROOGE, AND SAVAGE MISSILES

MOSKVA PARADE, 1 MAY 1967

25X1D
25X1D

This report has been prepared in response to GMAIC standing requirement 27-6 and to CIA requirement C-DS7-84,451, which requests detailed analysis of the SCAMP, SCROOGE, and SAVAGE missile transporters and the SAVAGE missile photographed during the 1 May 1967 Moskva parade. All measurements have been furnished by the NPIC Technical Intelligence Division and are accurate [REDACTED] [REDACTED] whichever is greater.

A comparison of the 3 missile transporters and the SAVAGE missile displayed during the 1 May 1967 Moskva parade with those observed in the Moskva parade on 7 November 1966 reveals several changes in the SCAMP transporter (Figures 1 and 2), which in the later parade appears to be very similar to that used for the SCROOGE missile (Figure 3). Changes noted in the SCAMP transporter include the extension of the leveling jacks to the rear, relocation of the jack pads to the upper part of the missile stand, elimination of the supporting rods formerly attached to the erecting hydraulic cylinders, rearrangement of the superstructure fuel containers, and modification of the driver's compartment so that its exterior resembles that of the SCROOGE transporter. The fender

cables previously observed on the SCROOGE transporter have also been added to the SCAMP vehicle. The only differences observed in the 2 transporters are: the 2 supports extending forward from the driver's compartment on the SCROOGE transporter are not present on the SCAMP vehicle; the distance between the outer edges of the 2 tracks on the SCAMP vehicle is [REDACTED] while on the SCROOGE transporter it is [REDACTED] feet. The longitudinal distance between the outer track wheels of the 2 vehicles, however, is the same.

25X1D
25X1D

No changes are observed in the SCROOGE transporter (Figure 3) or in the SAVAGE transporter and missile (Figure 4) displayed in the May 1967 parade from those seen in the November 1966 parade. The 2 SAVAGE missile canisters in the May 1967 parade displayed the same serial numbers (421228 and 421614) as those exhibited in the November 1966 parade, and the transporters are identical. The SCROOGE transporters and canisters exhibited in the 2 parades are similar, with only the canister numbers differing. Canister numbers N096 and N102 were displayed in the November 1966 parade, while in the May 1967 parade canister numbers N083 and N187 were observed.
